

## **Consent form for Peer-Led Team Learning Class in Computational Thinking:**

We are conducting a research study to evaluate the effectiveness of the teaching model used in the Computational Thinking Lab (CTL). This information will be used to assess whether educational outcomes warrant continuing or possibly expanding investment of resources in the CTL in future years.

We would like to use your archived information and information you filled on the CTL application form for the study. This information includes your programming experience, preparation in mathematics, gender, ethnicity, grade-point average, and grade in CSE 231. All records will be kept private. Data reported from this study will be in aggregate form only.

We may also solicit feedback within the next year by anonymous surveys. You may choose to not respond to any questions in surveys without any penalty.

Participation in this study is entirely voluntary. You may choose to withdraw from the study at any time or refuse to answer any questions. Doing so will not affect your relationship with Michigan State University.

Please direct any questions about this study to:

Dr. Laura Dillon  
428 S. Shaw Lane, Room 3115  
Engineering Building  
Department of Computer Science and Engineering  
Michigan State University  
East Lansing, MI 48824  
Email: [ldillon@msu.edu](mailto:ldillon@msu.edu)

**Statement of Consent:** I have read the above information, and have received answers to any questions I asked. I voluntarily agree to consent to participate in this study.

Your Signature \_\_\_\_\_ Date \_\_\_\_\_

Your Name (printed) \_\_\_\_\_

This consent form will be kept by the researcher for at least three years beyond the end of the study.
